1. Realised and unrealised exchange rate differences as well as assets and liabilities evaluation, including inventories, are recognised in the item.

2. Earnings Before Interest, Taxes, Depreciation and Amortization.

3. Adjusted for the impact of liquid fuels inventories valuation (driven by a significant change of the spread between diesel spot and forwards quotations), movements over time of costs related to NIT fulfilment and maintaining compulsory reserves, result on sales of the LPG cylinders segment, impact of natural gas inventories valuation and other movements of costs over time.

1. LETTER OF THE PRESIDENT OF THE MANAGEMENT BOARD

Dear Sirs, Dear Shareholders,

The first half of 2019, which was an exceptionally good period for the UNIMOT Group, is over. Our consolidated revenues for the first half of 2019 amounted to PLN 1.88 billion and were higher by 23.4% compared to the corresponding period of 2018. The adjusted EBITDA (cleaned for the impact of compulsory reserve valuation of liquid fuel reserves and one-time events) was clearly higher as well (by 498.5% yoy) and amounted to PLN 27.8 million. In this period, the net profit amounted to PLN 24.3 million (considering PLN 10.1 million loss in the corresponding period of the previous year). We managed to achieve

these solid financial results mainly due to an effective utilization of the favourable external environment in this period - mainly in the diesel segment, and thanks to the tenders won by our biofuels department. Lower operating costs achieved thanks to the restructuring process carried out at the turn of 2018/2019 also contributed to such good results.

I must admit that the results of the first half of this year are clearly better than our expectations. Immediately after preparing estimates for 2Q, we decided to significantly increase our forecasts of financial results for the entire 2019. We currently estimate that the consolidated adjusted EBITDA will amount to PLN 46.2 million (compared to PLN 34.0 million previously).

For the last six months, the financial data for our basic business segments is as follows: diesel and bio-fuels segment generated adjusted EBITDA profit in the amount of PLN 23.2 million (up by 268.8% yoy), the LPG segment achieved adjusted EBITDA profit at the level of PLN 3.6 million (up by 142.4% yoy), electricity segment - PLN 4.3 million (up by 13.0% yoy), and natural gas segment PLN 15.000.

The period of the first six months of this year was also abundant in significant business events.

In June the present year we entered micro-mobility by acquisition of 20% of shares in the company Green Electricity Sp. z o.o., the operator of the blinker.city platform, which offers rental services of electric scooters and scooters in Poland and Europe. We have also provided financing to the company, thanks to which its development can be even faster. We had been observing the micromobility market for a long time and wanted to participate in it through cooperation with an experienced partner who had already achieved a market success.

In June the present year the process of selling our LPG gas cylinder business was also completed, which resulted from the assumption of focusing only on the most margin-effective businesses in the Group. Pursuant to the agreement concluded in December 2018, UNIMOT transferred, for payment, the rights and obligations arising from contracts concluded with customers of LPG in cylinders along with a part of the assets related to this business to GASPOL. Thanks to this, in the LPG segment we can now focus on other, more promising areas for us – primarily the wholesale trade.

Another important element in our activity was the operational launch of the company Unimot Asia LLC, established in Shanghai, the task of which was to introduce to the Chinese market oils and lubricants under the AVIA brand. We found local partners, convinced them to cooperate and delivered the first orders for AVIA engine oils. Now we are waiting for the reaction of the market, which will condition our further steps.

In the context of our expansion to foreign markets, it is also important to launch first AVIA petrol stations in Ukraine. At present, there are already four of them operating there, including one in the capital of the country - Kiev. We achieved such a fast pace of development thanks to creating chains through two channels. The first of these is acquiring independent stations using their own local team, the other one – cooperation with a strong Ukrainian partner, the Wexler Group, which owns petrol stations within its structure that will undergo the rebranding process for the AVIA brand. The AVIA chain development plan in Ukraine is 15 stations by the end of this year.

In the following months of 2019, we will work on further effective utilization of favourable external environment, including strong demand and satisfying levels of diesel land premium. We also expect positive effects from recently won tenders for biofuels.

Finalisation of the optimisation process of natural gas assets, which we have been working on for several quarters, will also be an important activity. We managed to find a very attractive solution, which we communicated to the market on 12th August of the present year. We hope that after the transaction has been completed, only Unimot System will remain in the structures of the Unimot Group, in which we will become a 100% shareholder.

Shares in the other two gas companies: Blue LNG (which took over PPGW in July 2019) and Blue Cold - will become the property of the existing business partner. The transaction, based on the divestment agreement, will also involve arranging the structure of receivables and liabilities as well as bank guarantees and will be largely non-cash. This action will enable our natural gas segment to generate positive EBITDA, which will positively contribute to the EBITDA of the entire Group.

The last very good news is that Unimot Group was joined by a team of 11 specialists in the area of import and domestic sale of asphalt products, which in recent years has developed a significant position in this market segment in Poland. We hope that the new segment in the structures of the Unimot Group will bring additional revenues and profits already from the next quarters.

At the same time, I would like to take this opportunity to ensure that our financial and liquidity situation is very good, which is confirmed by our financial results. Despite the worse sentiment towards the industry, we also see no threat in the context of our business financing - in recent months we have extended further loan agreements with banks that are key for us.

Finally, I would like to thank, on behalf of myself and the other colleagues from the Management Board, the entire team of Unimot S.A. and other Group companies for the last six months of hard work. I also thank for the support of the Supervisory board and the trust of our Shareholders.

Yours faithfully

Adam Sikorski

President of the Management Board of Unimot S.A.

3. COMMENTARY ON THE FINANCIAL RESULTS AND THE SITUATION OF THE UNIMOT GROUP IN THE FIRST HALF OF 2019

3.1 PRINCIPAL EVENTS IN THE 1ST HALF OF 2019 WITH A DESCRIPTION OF SIGNIFICANT ACHIEVEMENTS OR FAILURES OF THE CAPITAL GROUP

- **Building the AVIA stations chain – issuance goal**

Following the public issuance of J series shares the Issuer obtained from investors the amount of PLN 96.6 million (net), of which PLN 23 million has been destined for building the chain of AVIA petrol stations based on *master franchising* contracts. The new distribution channel allows for reaching the new segment of fuel customers – retail customers.

At the end of 1H 2019 the AVIA chain included 46 stations, of which 6 have been connected to the chain since the beginning of the present year (two excluded following the process of chain optimisation) Slower than previously dynamics of including new objects into the chain results primarily from the Group's concentration on stations of highest efficiency potential. The Group is conducting negotiations and talks in several other locations in the territory of Poland and upholds its plan to acquire 100 stations until the end of 2020 and 200 stations until the end of 2023.

- **Commencing activity under the AVIA brand in Ukraine**

The Company has also commenced developing the AVIA chain in the territory of Ukraine. Having signed franchise contracts, the process of first stations rebranding began. The Issuer is introducing the brand as franchise at petrol stations, however, for the time being it does not supply fuels to petrol stations in the territory of Ukraine. As of the day of present statements publication the AVIA chain in Ukraine includes in total 4 stations in the following locations: Kiev, Wolica, Kalinovka and Uzhorod. The plan of AVIA chain development in Ukraine assumes 15 stations until the end of the present year.

- **Investment into blinkee.city**

In June 2019 UNIMOT S.A. took over 20 % of shares in Green Electricity sp. z o.o., operator of blinkee.city platform, which in offers services of renting electric bicycles, motor scooters and scooters in Poland and Europe. The amount of the investment is max. PLN 9.5 million, which comprises the purchased shares and providing Green Electricity with additional financing according to the needs. Currently, the Company provides renting of over 1500 electric scooters, electric bicycles and motor scooters through the Internet platform blinkee.city in 26 cities of Poland and also in Spain, Croatia, Romania, Sweden, Malta and Hungary. Within the confines of the agreed cooperation the companies are also planning to use the AVIA chain as a centre of electromobility servicing in smaller cities. Noticing the potential of the Polish and European market both companies are willing to continue the development of the sharing economy concept through expanding the fleet in the countries where they are already functioning and also through expansion to other cities and countries.

- **Sale of LPG cylinders segment to Gaspol S.A.**

Unimot S.A. sold the segment of LPG cylinders to Gaspol S.A. through a payable transfer of rights and obligations arising from contracts with customers of LPG in cylinders together with a part of assets related to this business in the locations where cylinders were sold: Zawadzkie, Częstochowa, Świdnica, Niwnica and Jordanów. The decision about selling this segment was driven by implementing the Issuer's strategy that assumes concentration on the areas of highest profitability and growth potential. In the LPG segment the Issuer wants to concentrate on other, more promising areas, primarily wholesale trade of LPG. The premises of gas bottling plant remained the property of Unimot S.A.

- On 11th April 2019 Unimot S.A. was recognised by the Forbes magazine as the Leader of Polish Entrepreneurship 2018. In the prestigious rank Forbes Diamonds, the Company was awarded the first place. The rank groups the fastest growing

companies and best entrepreneurs. The Company also won the regional rank of Forbes Diamonds in the Opolskie Voivodeship in the category of companies of revenues above PLN 250 million.

- In April 2019 Unimot S.A. was nominated again in the plebiscite Heroes of the Capital market organised by the Association of Individual Investors. The goal of the competition is to award and honour companies and journalists that through their activity contribute to the development of Polish capital market. The Company was nominated in the category “Stock exchange company conducting investor relations to individual investors at top level”.

- **Launching the operation under the AVIA brand in China**

The company UNIMOT Asia LLC, which on 12th September 2018 enlarged the UNIMOT Capital Group, conducts sales and distribution of automotive oils and lubricants under the AVIA brand in China. The company will also offer under the AVIA brand passenger car filters produced by PZL Sędziszów S.A., whose majority shareholder is Unimot Express Sp. z o.o. Under the red and white colours, the Company plans also to launch the development of petrol stations chain in China, which is currently being developed in Poland and Ukraine.

On 11th July 2019 a supply of engine oils of AVIA brand in the amount of 40 tonnes reached the first customer in China. Until the end of 2019 Unimot plans to sell on that market about 200 tonnes of AVIA oils.

Unimot estimates that the market of engine oils in China is about 8 million tonnes a year (compared to 200 thousand tonnes a year in Poland).

Events after the balance sheet date:

- **Disinvestment in the natural gas area**

On 13th August 2019 an agreement was signed on a partial disinvestment in the natural gas area, which covers the joint venture with Blue Line Engineering S.A. under the investment contract of 12th February 2014 (current report No 6/2014) with later annexes.

The result of the disinvestment process is supposed to be the acquisition by the Issuer 100% of shares in UNIMOT System Sp. z o.o. and acquisition by Blue Line Engineering S.A. 100% of shares in the remaining subsidiaries, i.e. Blue Cold Sp. z o.o. and Blue LNG Sp. z o.o., while simultaneously organising the structure of receivables and liabilities in these companies and bank collateral within the Issuer’s Capital Group and BLE Capital Group. The Issuer’s Supervisory Board expressed its consent to execute the process under the disinvestment contract negotiated by the parties.

The decision was made in relation to the adopted Capital Group’s Strategy for the years 2018-2023, in which the Issuer assumes, among others, gas assets optimisation and concentration on most margin-efficient businesses. The Issuer’s Capital Group will continue the development of natural gas sales and distribution by UNIMOT System Sp. z o.o., whose operating and financial standing has been gradually improving since mid-2018.

The process will be implemented as follows:

- Blue Line Engineering S.A. will transfer to the Issuer the shares held in UNIMOT System Sp. z o.o. of the value calculated as of the day of concluding the transaction in the estimated amount of PLN 13.5 million.
- The Issuer will transfer to Blue Line Engineering S.A. the shares held in Blue Cold Sp. z o.o., and
- UNIMOT System Sp. z o.o. will transfer to Blue Line Engineering S.A. the shares held in the subsidiary Blue LNG Sp. z o.o., while the estimated total value of the shares transferred from the UNIMOT Capital Group will amount to PLN 1.8 million.
- Settlement of the price for the shares in UNIMOT System Sp. z o.o. and Blue Cold Sp. z o.o. will occur through the settlement of mutual liabilities of Blue Line Engineering S.A. and the Issuer, in the estimated amount about PLN 13.5 million and the price for the shares in Blue Cold Sp. z o.o. in the estimated amount of PLN 0.05 million. Prices for the shares will be calculated as of the day of closing the agreements based on up-to-date settlements between the companies.
- Blue Line Engineering S.A. will pay to UNIMOT System Sp. z o.o. the remaining price for the shares in Blue LNG Sp. z o.o. in the amount of PLN 0.6 million.

The parties have agreed that the transaction will be finalised within the period of three months since the day the disinvestment contract is signed, on condition that all the necessary consents to transfer the ownership of shares and release the collateral to banks are obtained.

3.2 PRESENTATION OF BASIC ECONOMIC AND FINANCIAL SIZES OF THE CAPITAL GROUP

ASSETS STRUCTURE in PLN thousand	30.06.2019	30.06.2018
Fixed assets	79 197	84 074
Current assets	597 822	606 444
Inventory	248 173	285 907
Trade and other receivables	285 560	269 297
Financial resources and their equivalents	52 805	42 074
Other current assets	11 284	9 166
TOTAL ASSETS	677 019	690 518

LIABILITIES STRUCTURE in PLN thousand	30.06.2019	30.06.2018
Equity	217 574	186 317
Liabilities	459 445	504 201
Long-term liabilities	14 261	29 746
Short-term liabilities	445 184	474 455
TOTAL LIABILITIES	677 019	690 518

Working capital (inventories + receivables + cash resources – trade liabilities) is stable, other items do not demonstrate significant changes.

Inventory level considers operating inventories level and value of the level due to compulsory reserve in the amount of PLN 118.4 million as of 30th June 2019 against PLN 125.9 million as of 30th June 2018.

Short-term liabilities include working capital facilities for working capital financing and the credit for financing the compulsory reserve in the amount of PLN 83.7 million as of 30th June 2019 against PLN 100.2 million as of 30th June 2018.

STATEMENTS ON TOTAL REVENUES in PLN thousand	01.01.2019 - 30.06.2019	01.01.2018 - 30.06.2018
Revenues on sales	1 877 226	1 523 699
Profits (losses) on financial instruments hedging sales	480	(2 318)
Cost of sold goods, products and materials	(1 787 685)	(1 476 752)
Gross profit on sales	90 021	44 629
Other operating revenues	944	1 187
Sales costs	(53 883)	(44 855)
Overheads	(10 465)	(11 817)
Other net profits/losses	895	87
Other operating costs	(672)	(248)
Profit on operating activity	26 840	(11 017)
Financial revenues	8 047	4 503
Financial costs	(4 269)	(3 808)
Net financial costs	3 778	695
Profit before taxation	30 618	(10 322)
Income tax	(6 297)	254
Net profit for the financial year	24 321	(10 068)

In 1H 2019 the Group achieved a growth in revenues on sales compared to 1H 2018 at the level of 23.4%.

However, it needs to be stressed that since 2018 revenues and costs of wholesale energy trading through power exchange and brokerage platforms in Tradea Sp. z o.o. are not included into the gross sales result. According to the valid since 2018 IFRS 15 the result on this activity is directly included to revenues/financial costs (this refers to the amount of PLN 139.9 million of revenues in 1H 2018 and PLN 216.1 million of revenues in 1H 2019).

The growth in sales in 1H 2019 compared to 1H 2018 adjusted for the impact of implementing IFRS 15 amounts to 26.0% and is driven primarily by the growth in the area of diesel and bio-fuels (the sales of the remaining product lines remained at a similar level).

In 1H 2019 the group achieved the net profit at the level of PLN 24.3 million against the net loss in the amount of PLN 10.1 million in 1H 2018. The improved book results are driven primarily by a higher than in the corresponding period of the previous year margin on sales of goods (up by 101.7% yoy, including the impact of compulsory reserve valuation). The details have been presented in item 3.4 of the present statements.

COST BY TYPE STRUCTURE in PLN thousand	01.01.2019 - 30.06.2019	01.01.2018 - 30.06.2018
Amortisation	(3 081)	(2 778)
Electricity and materials consumption	(1 363)	(1 696)
Foreign services	(45 479)	(39 969)
Taxes and charges	(429)	(765)
Remunerations	(6 321)	(7 244)
Social security and other benefits	(1 327)	(1 654)
Other cost by type	(3 439)	(3 739)
TOTAL COST BY TYPE	(61 439)	(57 845)

In 1H 2019 cost by type remain at the level similar to 1H 2018. Lower costs of remuneration result from the conducted in 2H 2018 restructuring process described more fully in item 3.5 of the present statements.

RESULTS in PLN thousand	01.01.2019 - 30.06.2019	01.01.2018 - 30.06.2018
EBIT *	26 840	(11 017)
EBITDA **	37 794	(3 833)
GROSS RESULT	30 618	(10 322)
NET RESULT	24 321	(10 068)

* **EBIT ratio** --> defined as Earnings Before Interest and Taxes)

****EBITDA ratio** --> defined as Earnings Before Interest, Taxes, Depreciation and Amortization)

In 1 H 2019 the Group recorded EBIT profit in the amount of PLN 26.8 million against PLN -11.0 million in 1H 2018. In the scope of EBITDA result in turn, in 1H 2019 the Group achieved PLN 37.8 million against PLN -3.8 million in 1H 2018. The improved book results are driven primarily by a higher than in the corresponding period of the previous year margin on sales of goods (up by 101.7% yoy, including the impact of compulsory reserve valuation). The details have been presented in item 3.4 of the present statements.

RESULTS in PLN thousand - adjusted	01.01.2019 - 30.06.2019	01.01.2018 - 30.06.2018
EBITDA - adjusted	27 759	4 638
NET RESULT - adjusted	14 286	(1 597)

The results in 1H 2019 were adjusted for the following factors:

- Impact of liquid fuels inventories and moving costs over time related to NIT fulfilment and maintaining compulsory reserve PLN +9 152 thousand,
- Result on selling the LPG cylinders segment in the amount of PLN +1 385 thousand,
- Impact of natural gas inventories valuation in the amount of PLN -146 thousand,
- Impact of the remaining movements over time in the amount of PLN -356 thousand.

The above-mentioned events of cumulative positive impact on the results in 1H 2019 were described more fully in item 3.4 of the present statements.

Data related to the value of adjusted EBITDA in particular quarters has been presented on page 1 of the present statements in the figure "Adjusted EBITDA".

3.3 INDICATOR AND COMPARATIVE ANALYSIS OF THE CAPITAL GROUP

The presented below indicator evaluation of the Group was conducted on the basis of interim condensed consolidated financial statements for 1H 2019 and reference period.

Financial liquidity

The following ratios were used to assess the financial liquidity:

- **Current ratio - a ratio of current assets to short-term liabilities.** The ratio determining the ability of the Group to repay its current short-term liabilities in the medium term, this is after the realisation of owned stock, short-term financial assets, collection of short-term receivables and use of cash.
- **Quick ratio - a ratio of current assets net of stock to short-term liabilities.** The ratio determining the ability of the Group to repay its current short-term liabilities within a short time, this is after the realisation of short-term financial assets, collection of short-term receivables and use of cash on bank accounts.
- **Cash ratio - a ratio of cash balance to short-term liabilities.** The ratio determining the ability of the Group to immediately repay its current short-term liabilities within a short time, this is only after the realisation of owned cash on bank accounts.

FINANCIAL LIQUIDITY RATIOS	30.06.2019	30.06.2018
Current liquidity ratio	1,3	1,3
Quick liquidity ratio	0,8	0,7
Cash liquidity ratio	0,1	0,1

Liquidity ratio achieved at the end of 1H 2019 remains at safe levels. The possessed experience in the scope of receivables hedging, systematic policy of controlling merchant limits and long-term cooperation with financial institutions allow to maintain liquidity ratios at proper levels.

Profitability

Profitability analysis is based on a group of ratios allowing to assess the effectiveness of the sales activities of the Group and the impact of individual groups of costs on its financial result:

- **Rate of return on sales** - return on sales sets the efficiency of carried out sales activities, that is, it allows you to specify the part of profit remaining in the company to cover the costs of its operation – after taking into account the direct costs of sale. Similarly, this ratio allows you to determine the effect of Group's direct sale costs on its result.
- **Gross profitability** - determines the performance of activities carried out by the Group, that is, in general allows the assessment part of the income remaining in the Group to cover tax, after taking into account the costs of financial activities and abnormal events. Similarly, this ratio, interpreted in conjunction with the above ratios of profitability, allows the assessment part of the result that is built not by operating activities, but results from the financial activities or impact of the events of extraordinary nature.
- **Net profitability** - determines the revenue percentage of the Group representing its net result, that is after the costs of its activities have been covered: sales, operating, financial and after taxes have been paid.
- **Return on equity (ROE):** a ratio of net profit to average state of equity during a financial year. The ratio allows the investors to assess the performance of utilisation of capital entrusted to the Group. It means the percentage share of funds earned by the Group (net result) that can be paid in the form of a dividend, to the capital brought by investors plus part of cash earned by the Group in previous years (equity).
- **Return on assets (ROA):** a ratio of net profit to average state of assets during a financial year. The ratio allows the investors to assess the performance of utilisation of all assets owned by the Group.

PROFITABILITY RATIO	1H 2019	1H 2018
ROE	11,2%	-5,4%
ROA	3,6%	-1,5%
PROFIT RATE ON SALES	4,8%	2,9%
GROSS PROFITABILITY	1,6%	-0,7%
NET PROFITABILITY	1,3%	-0,7%

The growth in profitability ratios at all the analysed levels has been driven by the growth of the achieved result compared to the corresponding period of the previous year. The impact on higher financial results in 1H 2019 had factors described in detail in item 3.4 of the present statements.

PROFITABILITY RATIOS - adjusted	1H 2019	1H 2018
PROFIT RATE ON SALES - adjusted	4,3%	3,5%
NET PROFITABILITY - adjusted	0,8%	-0,1%

Ratios in 1H 2019 were been adjusted for the impact of the valuation of liquid fuels inventories and movement costs over time, result on the sale of the LPG cylinders segment, impact of natural gas inventories valuation and impact of the remaining movements over time.

The above-mentioned events of the cumulative positive impact on the results in 1H 2019 in the amount of PLN 10 035 thousand have been described more fully in item 3.4 of the present statements.

Efficiency of action

The following ratios were used to assess the efficiency of action:

- **Average collection period (days):** a ratio of trade receivables at the end of a financial year to revenue from net sales x 360. The ratio determines the average period in days which is followed by collection of receivables from invoices issued by the Group. In general, you should strive to minimise this ratio.
- **Creditor (days):** a ratio of short-term receivables against suppliers at the end of a financial year to revenue from net sales x 360 days. The ratio determines the average period in days which is followed by repayment of Group's liabilities. In general, you should strive to maximise this ratio.
- **Inventory turnover (days):** a ratio of average state of inventory at the end of a financial year to revenue from net sales x 360. The ratio determines the average period in days during which the Group holds the stock before sale thereof. Considering the performance, you should strive to minimise this ratio.

OPERATION EFFICIENCY RATIOS	30.06.2019	30.06.2018
Rotation of trade receivables (days)	27	32
Rotation of trade liabilities (days)	19	20
Inventory rotation (days)	24	34
Inventory rotation (days) - adjusted for compulsory reserve	12	19

The ratio shows the shortening of settlements compared to the corresponding period of the previous year. The inventory rotation ratio decreased from 34 days at the end of 1H 2018 to 24 days at the end of 1H 2019, in this due to compulsory reserve. The inventory rotation ratio adjusted for the value of the compulsory reserve decreased from 19 days at the end of 1H 2018 to 12 days at the end of 1H 2019, which means a fast rotation of inventories (mainly diesel).

Cash conversion cycle = a cycle from cash to cash

Cash to Cash = inventory cycle + receivable cycle – liability cycle

Cash to Cash = 24 days + 27 days – 19 days = 32 days

Adjusted for the value of compulsory provision cash conversion cycle amounts:

Cash to Cash = 12 days + 27 days – 19 days = 20 days

Debt assessment

The assessment of the degree of debt of the Group was made based on the following ratios:

- **Asset coverage ratio:** a ratio of the sum of equity value to the sum of total assets. The ratio determines the degree of coverage of the assets of the Group by its owned equities.
- **Debt ratio:** a ratio of total liabilities amount to value of assets in total. The ratio specifies to what extent the Group's assets were financed with debt.

DEBT RATIO	30.06.2019	30.06.2018
Total debt ratio	67,9%	73,0%
Equity/assets ratio	32,1%	27,0%
Equity to fixed assets ratio	274,7%	221,6%
Total debt ratio - adjusted for credit for mandatory reserve	63,3%	68,4%

Debt ratios at the end of 1H 2019 remain at the level similar to the end of 1H 2018, which means that significant sources of external financing of the activity conducted by the Group have not changed.

A positive evaluation of the above-mentioned ratios constitutes a basis for a positive evaluation of Group's capability to fulfil contracted liabilities and proves lack of threats in this scope.

3.4 PRINCIPAL FACTORS AND EVENTS AFFECTING THE GROUP'S RESULTS IN THE FIRST QUARTER OF 2019 THAT MAY AFFECT GROUP'S OPERATIONS IN THE SUBSEQUENT QUARTERS

Principal factors that affect financial results in the segments of Group's operations:

LIQUID FUELS TRADING SEGMENT

Diesel and bio-fuels

In 1H 2019 the Group continued the development in the diesel sales area. Unimot imported the product by tankers to Gdynia port and by rail and transported it in tanker trucks to several fuel depots in the territory of the whole country, from where it was supplied mainly to the clients of transport and logistics industry. Additionally, Unimot sold fuels purchased from Polish fuel concerns.

In 2019 the Group fulfils the obligation to fulfil in the given year a minimum share of bio-components in the total amount of sold liquid fuels according to the National Indicative Target, mainly through physically adding bio-components to imported liquid fuels in the blending process. The level of NIT for 2019 amounted 8.0% according to the calorific value and in 2018: 7.5%.

The Group also conducted bio-fuels sales in a purely commercial trade (outside NIT).

<i>in PLN thousand</i>	01.01.2019 - 30.06.2019	01.01.2018 - 30.06.2018	change %
Sales volume [m3]	483 260,4	409 819,8	17,9%
Total revenues	1 656 988	1 322 616	25,3%
EBITDA	32 381	(2 172)	-
EBITDA - adjusted	23 229	6 299	268,8%
Profit/(loss) for the period	28 088	(6 060)	-
Profit/(loss) for the period – adjusted	18 936	2 411	685,3%

In 1H 2019 the Group sold 483.3 thousand m3 of liquid fuels and bio-fuels, which constituted a growth by 17.9% against the corresponding period of the previous year.

The consequence of the growth in volumes and also the growth in market prices of diesel is the recorded growth in revenues to PLN 1 657.0 million (up by 25.3% yoy).

The results in 1H 2019 were adjusted for the impact of liquid fuels inventories valuation and movement costs over time related to NIT fulfilment and maintaining compulsory reserves of total positive impact on the segment's results in the amount of PLN 9 152 thousand.

The achieved EBITDA amounted to PLN 32.4 million and adjusted EBITDA PLN 23.2 million (up by 268.8% yoy). The net profit for 1H 2019 amounted to PLN 28.1 million and adjusted profit for 1H 2019 PLN 18.9 million (up by 685.3% yoy).

The results in 1H 2019 in this segment were driven primarily by the following factors:

- **Higher yoy sales volumes of diesel and petrol driven by high demand.**
- **Significantly higher levels of trade margins on diesel yoy** – more favourable market situation, effective utilisation of Polish product trading and joint purchases of ships with other entities.
- **Higher yoy sales volumes of bio-fuels** driven by won tenders.
- **Lower yoy operating costs** – as a result of the conducted optimisation proces the Group has significantly decreased operating costs primarily through: employment optimisation, reduction of logistics costs, costs of financial services, administrative costs and costs of vehicle fleet as well as costs of advertising and representation.
- **Diesel compulsory reserve valuation** – prices of diesel stored by Unimot for compulsory reserve are hedged by the Group through futures transactions, therefore, they are not affected by a nominal change in the level of fuel prices. However, the valuation is affected by the spread between the spot price (according to which the Group is obliged to value stock levels) and the and forwards price (according to which the Group is obliged to value hedging financial transactions).

In 2016 the differences between the spot diesel quotations and forwards quotations were stable, so they did not affect the financial results. Since 2017, due to a higher level co compulsory reserve and the market situation – the book results achieved by the Group include the impact of reserve valuation related to the change of the difference between the spot and forwards price. In 1H this impact amounted to PLN +9 152 thousand.

In the future, on the assumption that the compulsory reserve is physically maintained, one should expect further burdens to the book result for this reason (in the long term the moment the hedging futures are mature, the differences in reserve and futures valuation will be offset).

The results of future quarters will primarily be affected by the following factors:

- **Land premium level** (difference between the price on the local market and price in the ports where fuel is supplied to the country) for diesel – the dominant assortment in the Group’s sales structure. The level of land premium determines the area of possible to achieve trade margin net of logistics costs (transport costs, costs of transshipment services, quality examination), costs of renting the capacity of fuel bases, costs of securing receivables (following the trade security policy adopted by the Group), and also costs of NIT obligation fulfilment.
- **Dynamics and direction of diesel prices changes** – high dynamics of growth has a negative impact, high dynamics of drops - a positive impact.
- **Market structure** (contango/backwardation).
- **Volume of working capital** indispensable to finance achieved turnovers, which depends on the level of fuel prices on the markets and prolonging possessed working capital facilities.
- **Global supply situation in Europe.**

LPG

In 1H 2019 the Group continued LPG trading concentrating primarily on its wholesale.

<i>in PLN thousand</i>	01.01.2019 - 30.06.2019	01.01.2018 - 30.06.2018	change %
Sales volume [T]	75 902,0	60 050,0	26,4%
Total revenues	155 521	132 551	17,3%
EBITDA	5 009	1 495	235,1%
EBITDA - adjusted	3 624	1 495	142,4%
Profit/(loss) for the period	4 688	894	424,4%
Profit/(loss) for the period – adjusted	3 303	894	269,5%

After a difficult 2018, where unfavourable market environment occurred, which was primarily driven by instability of product supplies to Poland, in 1H 2019 the situation improved, which allowed the Group to achieve significantly better financial results. Additionally, a support constituted intensive utilisation of alternative sources of gas supplies to own depot (vehicle transport), which ensured a better predictability and more favourable margins in the situation of price changes and also development of international sales.

In 1H 2019 the Group sold 75.9 thousand tonnes of LPG, i.e. by 26.4% more yoy. The growth in sales translated into a growth in revenues, which in that period amounted to PLN 155.5 million (up by 17.3% yoy).

The results in 1H 2019 were adjusted for the result on the sale of the LPG cylinders segment in the amount of PLN 1 385 thousand.

The achieved EBITDA amounted to PLN 5.0 million (up by 225.1% yoy), and adjusted EBITDA PLN 3.6 million (up by 142.4% yoy). The profit for 1H 2019 amounted to PLN 4.7 million (up by 424.4% yoy), and adjusted profit for 1H 2019 PLN 3.3 million (up by 269.5% yoy).

GAS FUELS TRADING SEGMENT

The Group conducts activity in the scope of trading, sales and distribution of natural gas with the use of inhouse infrastructure (gas network, LNG regassification stations), foreign infrastructure and Polish Power Exchange.

<i>in PLN thousand</i>	01.01.2019 - 30.06.2019	01.01.2018 - 30.06.2018	change %
Sales volume [GWh]	162,3	246,8	-34,2%
Total revenues	18 256	23 417	-22,0%
EBITDA	(131)	(2 215)	-
EBITDA - adjusted	15	(2 215)	-
Profit/(loss) for the period	(1 272)	(3 575)	-
Profit/(loss) for the period – adjusted	(1 126)	(3 575)	-

The activity in the natural gas segment in 1H 2019 was continued. The segment comprises the activity of gas companies based on inhouse infrastructure, sales of gas to final customers by Unimot Energia i Gaz Sp. z o.o. and wholesale trade of gas in Unimot S.A.

The consolidated sales volumes are lower by 34.2% yoy, which was driven by a significantly lower trading activity, which in the last quarters have been significantly reduced by the Group. The volumes of gas companies amounted to 24.9 GWh, which means a growth by 17.2% yoy, primarily driven by conducting sales to a new, large industrial customer. The volumes of Unimot Energia i Gaz amounted to 23.7 GWh (down by 54.1% yoy) primarily due to high basis (executing large tenders in the corresponding period of the previous year).

The results in 1H 2019 were adjusted for the impact of natural gas inventories valuation in the amount of PLN -146 thousand.

Revenues from external customers of this segment amounted to PLN 18.3 million (down by 22.0% yoy), and EBITDA reached the level of PLN -0.13 million against PLN -2.2 million a year before (adjusted EBITDA PLN 15 thousand against PLN -2.2 million a year before). Better yoy financial results are primarily driven by higher prices of gas sales and distribution (according to new tariffs) and lower purchase prices (on PPE and LNG purchase (based on TTF), mainly at the terminal in Świnoujście). A negative impact on the results had further realisation of futures concluded in the past at unfavourable prices (trading) – related EBITDA amounted to about PLN -0.3 million (total in 1Q 2019).

Moreover, the Group is during the process of gas business optimisation, in particular optimisation of assets – the details have been described more fully in item 3.2 of the present statements.

The results of future periods will be influenced primarily by market prices of natural gas, implementing connections of new customers and also maintaining the levels of currently valid tariffs at Unimot System.

ELECTRICITY SEGMENT

The Group continues the development of electricity sales project as an element of implementing its strategy of creating a multi-energy sales offer. This segment comprises wholesale electricity trading through exchange and brokerage platforms of Tradea Sp. z o.o. and sales of electricity by Unimot Energia i Gaz Sp. z o.o. to final customers with the use of foreign infrastructure.

<i>in PLN thousand</i>	01.01.2019 - 30.06.2019	01.01.2018 - 30.06.2018	change %
Sales volume [GWh]	921,3	957,9	-3,8%
Total revenues	29 952	34 472	-13,1%
EBITDA	4 344	3 844	13,0%
Profit/(loss) for the period	4 278	3 822	11,9%

The segment recorded a drop of sales volumes from 957.9 GWh in 1H 2018 to 921.3 GWh in 1H 2019 (down by 3.8% yoy). The drop was recorded in the area of electricity wholesale through exchange and brokerage platforms.

According to the valid since 2018 IFRS 15 the result on this activity is directly included into financial revenues/costs (this refers to the amount of PLN 216.1 million of revenues in 1H 2019 and PLN 139.9 million of revenues in 1H 2018). Therefore, the level of revenues in the consolidated financial statements is not proportional to the level of presented volumes.

In the area of electricity sales to final customers a significant growth in sold volumes occurred, from 22.9 GWh in 1H 2018 to 59.7 GWh in 1H 2019 (up by 160% yoy).

The segment recorded an improvement of profit from PLN 3.82 million in 1 H 2018 to PLN 4.28 million in 1H 2019 (up by 11.9% yoy) and EBITDA from PLN 3.84 million in 1H 2018 to PLN 4.34 million in 1H 2019 (up by 13.0% yoy).

Tradea Sp. z o.o. achieved results accordant with the assumptions for 2019.

Unimot Energia i Gaz Sp. z o.o. in the current half for the first time achieved a positive result at the level of net profit and EBITDA.

Future revenues from contracts signed with customers by Unimot Energia i Gaz Sp. z o.o. as of 30th June 2019 are as follows:

<i>in PLN thousand</i>	01.07.2019 - 31.12.2022
Future revenues in the period 01.07.2019 - 31.12.2022	118 895
Gross profit on sales	18 209
Cost of contract acquisition	(6 756)
Profit/(loss) on sales	11 453

OTHER ACTIVITY

Petrol stations

The segment's revenues include the revenues on fuel sales at the Issuer's own stations under the AVIA brand and investment charges, fixed and other charges received from franchised AVIA stations. Sales of fuels to franchised AVIA stations is recorded in the segment „Diesel and bio-fuels”.

At the end of 1H 2019 the AVIA chain included 46 stations, of which 6 have been connected to the chain since the beginning of the present year (two excluded following the process of chain optimisation) Slower than previously dynamics of including new objects into the chain results primarily from the Group's concentration on stations of highest efficiency potential.

The petrol stations segment recorded a growth in revenues on sales from PLN 8.1 million in 1H 2018 to PLN 16.7 million in 1H 2019 (up by 106.9% yoy).

The segment recorded an improvement of the result from PLN -1.54 million in 1H 2018 to PLN -1.13 million in 1H 2019 and EBITDA from PLN -1.34 million in 1H 2018 to PLN -0.76 million in 1H 2019.

The sales costs of this segment in the amount of PLN 3 517 thousand include the costs of own petrol stations as well as costs related to the development of AVIA stations chain.

Asphalts – a new segment

Within its operations Unimot S.A. has created a new segment in charge of import and distribution of asphalt products in Poland. It is a new segment for the Capital Group that will supplement the Group's offer in the area of petroleum-derived products.

Domestic production of asphalts covers about 80% of the market demand. Therefore, similarly to diesel, import is necessary, which amounts about 200 thousand tonnes per year.

The Group was joined by a team of 11 experts in the area of import and domestic sales of asphalt products, which in recent years has achieved a significant position in this market segment in Poland.

Asphalt products will be offered on the Polish market under the AVIA Bitumen brand. First sales transactions of the new segment and profits consolidated into the Group's results are expected already in next quarters.

OTHER

The segment comprises transformer oils and other assortment items that do not belong to identified segments. Segment's results do not influence significantly the results of the whole Capital Group.

Additionally, the Group's financial results were influenced by the following factors:

- **Independent maintenance of compulsory reserve of fuels** - in accordance with the Law on Obligatory Stocks (the Law of 16 February 2007 on stocks of petroleum, petroleum products and natural gas and the principles of proceedings in the situations of state's fuel security threat and disturbances on oil market, i.e. (Journal of Laws. 2014 pos. 1695, with future amendments) instead of charges (tickets) for external companies. On 20th May 2019 the Company signed an annex to the agreement, which enables the Issuer to purchase diesel oil stored for independent creation of compulsory reserve, prolonging the period of its validity until 20th April 2020. On 10th April 2018 the Company signed an annex to the agreement with fuel depots operator, which enables the Issuer to use storage space for independent creation of diesel oil compulsory reserve for the period until 31st December 2019. Concluding the aforementioned agreements and independent maintenance of compulsory reserve combined with concluding transactions hedging diesel market price, significantly decrease the cost of maintaining compulsory reserves, compared to charges (tickets) for external companies.

3.5 LEVEL OF GROUP'S STRATEGY IMPLEMENTATION AND REFERENCE TO FINANCIAL RESULTS FORECASTS

In June 2018, the UNIMOT Group prepared and announced the Strategy for the years 2018-2023. Below, the Issuer presents major strategic goals together with a comment on their implementation::

- **Achieving PLN 75 million EBITDA in 2023**

The Group is implementing the goal by adopting a series of strategic initiatives, developing the diesel business as well as LPG, natural gas and electricity. Ultimately, the EBITDA result will be also largely contributed by the systematically expanded chain of AVIA petrol stations.

As a result of actions taken in 2H 2018, for the entire 2018 the Group achieved consolidated EBITDA of PLN 13.5 million, i.e. exceeding the forecast value of PLN 12 million by 12.6%.

On 5th August 2019, the Issuer made public the information about the update of the forecast for 2019 (current report No. 21/2019). The updated EBITDA forecast adjusted for 2019 amounts to PLN 46.2 million. The Management Board made a decision on the increase in the forecast based on consolidated financial results for 1Q 2019, estimates of consolidated financial results for 2Q 2019, which it made public on 5th August 2019 (current report No. 20/2019) and slightly changed budget assumptions for 3Q and 4Q 2019.

Based on the above-mentioned data, EBITDA adjusted for 1H 2019 amounts to PLN 27.8 million, which means that the current forecast for the entire 2019 has been carried out in over 80%. The higher-than-expected EBITDA adjusted for the 1H 2019 was mainly due to favourable market conditions in the diesel sales segment and the greater number of won tenders for biofuels. The Management Board emphasises that the current assumptions for 3Q and 4Q 2019 have not changed significantly.

Proгноza EBITDA skorygowana*
[mln zł]

Wykonanie:
2017 = 24,7
2018 = 31,5

* Forecasts of financial results for the years 2019-2023 concerns adjusted EBITDA (i.e. adjusted for an estimated valuation of diesel compulsory reserve, justified movements and one-time events). Information about adjusted EBITDA the Company will publish together with financial results according to previously applied practice.

As of the publication date of the statements, the Issuer maintains the forecasts of results for the Group that were publicly announced for subsequent periods, i.e.: adjusted EBITDA for the years 2020, 2021, 2022, 2023 will amount to PLN 44.2 million, PLN 54.3 million, PLN 64.9 million, PLN 74.8 million, respectively.

- **Increased business efficiency measured by the ROCE index (calculated as EBITDA / assets net of short-term liabilities) – in 2023 ROCE = 15%**

The UNIMOT Group is going to systematically improve efficiency of all businesses ultimately reaching the ROCE index at the level of 15%. To do so, it undertakes a number of actions – both on the revenue as well as cost side. At the end of 2018 the ROCE index (calculated as EBITDA / fixed assets net of working capital) amounted to 14.4%, and at the end of 1H 2019 – 16.7%, which is more than the 15% level assumed for the year 2023.

- **Activity diversification – generating in 2023 70% of EBITDA from intensively developing businesses beyond diesel**

The Company is developing and enlarging the scale of all conducted businesses. However, the fastest changes are assumed in the areas beyond diesel, which previously constituted the basis of the Issuer's activity. This is carried out primarily through:

- growth of the number of stations in the AVIA chain to 200 in 2023 at an assumption to concentrate on most prestigious locations,
- creation of a new source of profits in the form of non-fuel products sold at AVIA stations ,
- doubling the sales of LPG, mainly through further development of wholesale and intensification of sales in the scope of autogas ,
- development of attractive business areas in the scope of electricity and natural gas in response to future market trends (e.g. LNG stations),
- optimisation of assets in the natural gas business - the above event has been described in more detail in item 3.2 of the statements.

Events after the balance sheet date related to diversification of operations

- **Asphalts – creating a new segment**

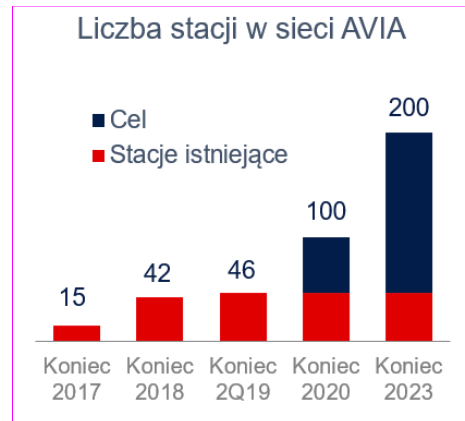

Within its operations Unimot S.A. has created a new segment in charge of import and distribution of asphalt products in Poland. It will supplement the Group's offer in the area of petroleum-derived products.

Asphalt products will be offered on the Polish market under the AVIA Bitumen brand. First sales transactions of the new segment and profits consolidated into the Group's results are expected already in next quarters.

▪ **Development of AVIA chain in Poland – 200 petrol stations until the end of 2023**

One of the most important elements of the strategy for the years 2018-2023 is a dynamic development of the AVIA chain. The Issuer's goal is to own 200 of AVIA petrol stations in 2023

To achieve this assumption the Company wants, among others, to increase the attractiveness of franchise offer through: introduction and development of a fleet card, increased elasticity of cooperation terms depending on the station's potential, creating several flagship stations and expanding the offer with new products and services.

As of 30.06.2019 the AVIA chain included 46 stations, where 6 of them had been connected to the chain since the beginning of the present year (two of them had been excluded due to chain optimisation process). The lower dynamics of connecting new facilities to the chain than before results mainly from the Group's concentration on stations with the highest efficiency potential.

▪ **Annual dividend payment in the amount of min. 30% of net profit of UNIMOT S.A.**

According to the dividend policy in force, in case net profit is achieved in the given fiscal year, the Management Board will recommend to the General Meeting of the Company to pay an annual dividend in the amount of min. 30% of the standalone net profit achieved in the given financial year.

Dividend for the year 2017 was paid on 19th June 2018. The Ordinary General Meeting of the Company decided to pay PLN 13.9 million of dividend (PLN 1.70 per share), which constituted 55.1% of standalone net profit.

In 2018 the standalone net result of UNIMOT S.A. was negative.

▪ **Cost optimisation**

Apart from the aforementioned strategic goals, in mid-2018 the Company began the process of cost optimisation aimed at achieving a more competitive position on the market. Until the end of 2018 almost all actions aimed at reducing operating costs by PLN 10 million per year (strategic goal) were undertaken. Finally, a greater reduction than expected was achieved - in 2019, the costs will be lower by over PLN 13 million. Achieved savings consist of the following items:

- employment optimization – lower costs in 2019 by PLN 7.1 million,
- reduction of logistics costs – lower costs in 2019 by PLN 2.2 million,
- reduction of car fleet costs – lower costs in 2019 by PLN 0.7 million,
- reduction of financial services and administration costs – lower costs in 2019 by PLN 0.9 million,
- reduction of advertising and representation costs - lower costs in 2019 by PLN 0.7 million,
- optimisation of other areas - lower costs in 2019 by PLN 1.8 million.

3.6 SHARES OF UNIMOT S.A. ON WARSAW STOCK EXCHANGE

1H 2019 on the Warsaw Stock Exchange cannot be treated as successful.

Index WIG in this period gained 3.5% - far less than indexes of world exchanges. Among the industry indexes the most undervalued was WIG-energia (-11.3%) and WIG-paliwa (-15.0%), most gains recorded WIG-telekomunikacja (+42.0%) and WIG-informatyka (+40.0%).

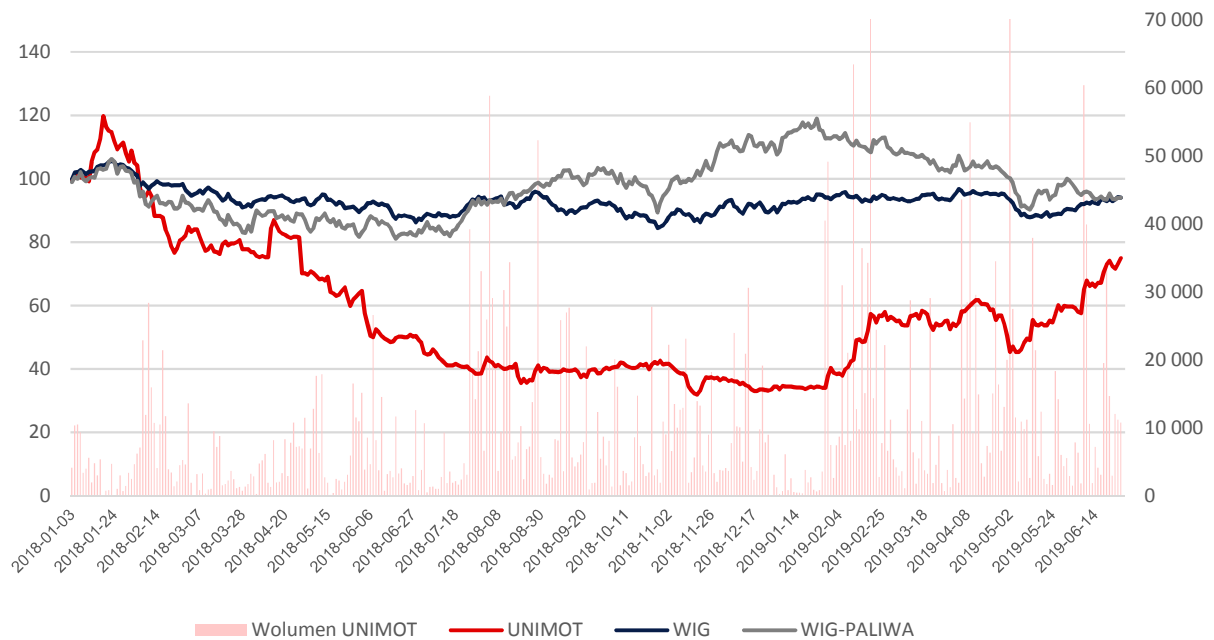

At the end of June 2019 there were 410 domestic companies quoted on the Main Market of the Warsaw Stock Exchange of total capitalisation PLN 594.4 billion and 50 foreign companies of the total value of PLN 567.4 billion. The value of stock trading within the order book was in this period by 4.7% lower than a year before and amounted to PLN 15.9 billion.

During 1H 2019 the price of shares of UNIMOT S.A. on the WSE ranged from PLN 8.00 (on 4th January) to PLN 17.9 (on 27th June). On 28th June, that is the last day of trading in 1H 2019 the price of shares of UNIMOT S.A. amounted to PLN 17.85, that is higher by 124.5% than on the last day of trading in 2018. At the end of 1H 2019 the market value of UNIMOT S.A. reached the level of PLN 146.7 million, while the book value amounted to PLN 211.6 million.

In 1H 2019 the Company was included into the following indexes: WIG-Poland, InvestorMS, WIG-PALIWA, WIG.

Price of UNIMOT shares compared to indexes WIG and WIG-Paliwa

4. INTERIM STATEMENTS OF THE MANAGEMENT BOARD ON THE UNIMOT GROUP'S ACTIVITY

4.1 PARENT EQUITY'S DATA

Unimot Spółka Akcyjna ("Unimot S.A.", "Company", "Parent equity") with its registered office in Zawadzkie, at 2A Świerklańska, is a Parent equity in the Unimot Capital Group ("Capital Group", "Group"). The Company was entered on 29th March 2011 into the Business Register of the District Court in Opole VIII Commercial Division of the National Court Register, as KRS number: 0000382244.

Unimot S.A.'s shares from 7 March 2017 have been listed on the Warsaw Stock Exchange

The primary activity of the Group is retail and wholesale of gas, liquid fuels, petroleum products, electricity and development and construction of natural gas distribution network.

As of the date of this consolidated financial statements, the composition of the management and supervisory bodies of the Parent Equity was as follows:

Composition of the Management Board:

Adam Sikorski - President of the Management Board
 Robert Brzozowski - Vice-President of the Management Board
 Marek Moroz - Vice-President of the Management Board

Composition of the Supervisory Board:

Andreas Golombek – President of the Supervisory Board
 Bogusław Satława - Vice-President of the Supervisory Board
 Piotr Cieślak - Member of the Board
 Isaac Querub - Member of the Board
 Piotr Prusakiewicz - Member of the Board
 Ryszard Budzik - Member of the Board
 Dariusz Formela - Member of the Board

4.2 COMPOSITION OF THE UNIMOT CAPITAL GROUP

As of 30th June 2019, the Parent Equity Unimot S.A. owned directly and indirectly the shares of the following subsidiaries:

Name of subsidiary	The Seat	Scope of unit's basic operations	Owned shares and voting rights	Date of obtaining
Unimot System Sp. z o.o.	Poland	distribution of gas fuels through mains	58.74%	20.01.2014
Polskie Przedsiębiorstwo Gazownicze Warszawa Sp. z o.o. (PPGW Sp. z o.o.)	Poland	distribution of gas fuels through mains	58.74%	26.03.2014
Blue Cold Sp. z o.o.	Poland	gas fuels production	50.76%	29.04.2014
Blue LNG Sp. z o.o.	Poland	distribution of gas fuels through mains	58.74%	4.07.2014
Unimot Paliwa Sp. z o.o. *	Poland	liquid fuels distribution	100,00%	16.11.2015
Unimot Energia i Gaz Sp. z o.o.	Poland	electricity and liquid fuels distribution	100,00%	30.12.2015
Unimot Energia i Gaz Sp. z o.o. SK.A.	Poland	liquid fuels distribution	100,00%	30.12.2015
Tradea Sp. z o.o.	Poland	electricity distribution	100,00%	23.05.2016
Unimot Ukraine LLC	Ukraine	liquid fuels distribution	100,00%	19.04.2018
Unimot Asia LLC	China	liquid fuels distribution	100,00%	04.09.2018
Unimot Energy LLC	Ukraine	electricity distribution	100,00%	02.04.2019

* change of name of the company from Tankuj24.pl Sp. z o.o. to Unimot Paliwa Sp. z o.o. on 28.03.2019

In 1H 2019 the following changes occurred in the organisational structure of the Unimot Capital Group:

- On 27th March 2019 the Parent Entity Unimot S.A. increased the capital in Unimot Ukraine LLC acquiring 1000 new shares at EUR 100 each, as a result the share capital of this company has increased by EUR 100 thousand. The share percentage of the Parent Entity in Unimot Ukraine LLC has not changed and amounts to 100.00%.
- On 2nd April 2019 the subsidiary Tradea Sp. z o.o. established a subsidiary Unimot Energy LLC, into which it provided the share capital in the amount of EUR 100 thousand. The percentage share of Tradea Sp. z o.o. in Unimot Energy LLC amounts to 100 %.
- On 28th June 2019 the Parent Entity Unimot S.A. increased the capital in Unimot Energia i Gaz Sp. z o.o. acquiring 1000 of new shares at PLN 1000 each, as a result the share capital of this company has increased by PLN 1.0 million. The percentage share of Unimot S.A. in Unimot Energia i Gaz Sp. z o.o. has not changed and amounts to 100,00%.

Changes after the balance sheet date:

- On 24th July 2019 the Parent Entity Unimot S.A. increased the capital in Unimot Energia i Gaz Sp. z o.o. acquiring 1000 of new shares at PLN 1000 each, as a result the share capital of this company has increased by PLN 1.0 million. The percentage share of Unimot S.A. in Unimot Energia i Gaz Sp. z o.o. has not changed and amounts to 100,00%.

Mergers executed in 2019:

No mergers in the period from 1st January to 30th June 2019.

Disposals executed in 2019:

No disposals in the period from 1st January to 30th June 2019.

Mergers after the balance sheet date:

On 31 July 2019 a merger was registered in KRS with regard to Blue LNG Sp. z o.o. and PPGW Sp. z o.o. The merger was executed through transfer of the whole assets of PPGW Sp. z o.o. to Blue LNG Sp. z o.o. in return for shares that Blue LNG Sp. z o.o. issued to the partner of PPGW Sp. z o.o. (Unimot System Sp. z o.o.) The percentage share of Unimot System Sp. z o.o. in the merged entity amounts to 100 %.

The Issuer does not own foreign nor domestic investments into securities, intangible and legal assets or properties.

4.3 ISSUER SHAREHOLDER'S STRUCTURE

The shareholders who won directly or indirectly through subsidiaries at least 5% of the general number of votes in the Issuer's General Meeting as of the day of submitting the present consolidated financial statements:

Shareholder	Number of	Share in capital %	Number of votes	Share in votes %
Unimot Express Sp. z o.o.	3 593 625	43,84%	3 593 625	42,04%
Zemadon Limited	1 616 661	19,72%	1 966 661	23,01%
Others	2 987 532	36,44%	2 987 532	34,95%
Total	8 197 818	100,00%	8 547 818	100,00%

4.4 SUMMARY OF THE ISSUER'S SHARES HELD BY MANAGING AND SUPERVISING PERSONS

Mr Robert Brzozowski – the Vice-President of the Issuer's Management Board holds 32.030 of Issuer's shares, whose share in the share capital as of the balance sheet date 30.06.2019 amounted 0.39%, and the share in the total number of votes at the General Meeting amounted 0.37%.

Mr Marek Moroz – the Vice-President of the Issuer's Management Board held 4.750 of Issuer's shares as of 30.06.2019, whose share in the share capital as of the publication date of these statements amounted 0.06%, and the share in the total number of votes at the General Meeting amounted 0.06%.

Mr Adam Antoni Sikorski – the President of the Issuer's Management Board, owns indirectly 100% of shares of Zemadon Ltd. in Cyprus through "Family First Foundation" seated in Vaduz in Liechtenstein which he controls and the beneficiary of which is the family of Mr Adam Antoni Sikorski.

Zemadon Ltd., with its registered office in Nicosia, Cyprus, is a major shareholder of the Issuer, which as of 30.06.2019 owns 19.72% in the Issuer's share capital and 23.01% in votes at the Issuer's General Meeting.

Zemadon Ltd., with its registered office in Nicosia, Cyprus is also a shareholder in Unimot Express Sp. z o.o. (the main shareholder of the Issuer) which has 49.75% of share in the share capital and votes. The second partner of Unimot Express Sp. z o.o. is Mr. Adam Władysław Sikorski (nephew of the Chairman of the Supervisory Board Mr. Adam Antoni Sikorski) with 49.75% share and votes at a meeting of shareholders. The remaining minority share which is 0.5% in the share capital and votes in Unimot Express Sp. z o.o. is owned by Mrs Magdalena Sikorska, wife of Adam Antoni Sikorski – the President of the Management Board

As of 30.06.2019 Unimot Express sp. z o.o. owned 43.84% in the share capital and 42.04% in votes at the General Meeting of Unimot S.A.

Since 5th December 2016 the spouses Adam Antoni Sikorski and Magdalena Sikorska, due to their oral agreement on conducting common policy towards Unimot Express Sp. z o.o. and Unimot S.A., indirectly through Unimot Express Sp. z o.o. and Zemadon Ltd. controlled a total of 63.56% of the share capital and 65.05% of votes in the General Meeting of Unimot S.A.

The entity related with the Issuer, due to being subject to joint control by Unimot Express Sp. z o.o. is Unimot-Truck sp. z o.o. seated in Warsaw, where Unimot Express Sp. z o. o. has 52.02% of share in the share capital and Ammerviel Ltd., seared in Nicosia, Cyprus, in which Unimot Express Sp. z o. o. has 100% of shares. The company related with the Issuer is also PZL Sędziszów S.A. with its registered office in Sędziszów Małopolski, in which Mr. Adam Antoni Sikorski owns 48.78% and Unimot Express SP. z o.o. owns 48.78% of share in the share capital. The unit related with the Issuer, due to be being subject to common control by Mr. Adam Antoni Sikorski – the Chairman of the Supervisory Board (indirectly by Zemadon Ltd.) is U.C. Energy Ltd. seated in Cyprus.

4.5 COURT PROCEEDINGS

Neither the Issuer nor any of its subsidiaries is a party to the proceedings before a Court, a competent authority for the arbitral proceedings or a public authority concerning the obligations or receivables, which could significantly influence financial results.

Neither the Issuer nor any of its subsidiaries is a party to two or more proceedings before a Court, a competent authority for the arbitral proceedings or a public authority concerning the obligations or receivables, which could significantly influence financial results.

4.6 SEASONALITY OF OPERATIONS

The Group's operations are subject to seasonability. With respect to diesel fuel (the dominant product in the Group's sales), seasonality is manifested by higher demand in the summer and lower in the winter.

4.7 DESCRIPTION OF FACTORS AND EVENTS, INCLUDING UNUSUAL ONES, SUBSTANTIALLY INFLUENCING THE CONDENSED FINANCIAL STATEMENTS

The most important factors that influence the financial results in the Group's operating segments (diesel, bio-fuels, LPG, natural gas, electricity and petrol stations) have been presented in item 3.4 of the present statements.

Additionally, the factor that influences the financial results is independent maintenance of compulsory reserve of fuels:

- In accordance with the Law on Obligatory Stocks (the Law of 16 February 2007 on stocks of petroleum, petroleum products and natural gas and the principles of proceedings in the situations of state's fuel security threat and disturbances on oil market, i.e. (Journal of Laws. 2014 pos. 1695, with future amendments) instead of charges (tickets) for external companies. On 20th May 2019 the Company signed an annex to the agreement, which enables the Issuer to purchase diesel oil stored for independent creation of compulsory reserve, prolonging the period of its validity until 20th April 2020. On 10th April 2018 the Company signed an annex to the agreement with fuel depots operator, which enables the Issuer to use storage space for independent creation of diesel oil compulsory reserve for the period until 31st December 2019. Concluding the aforementioned agreements and independent maintenance of compulsory reserve combined with concluding transactions hedging diesel market price, significantly decrease the cost of maintaining compulsory reserves, compared to charges (tickets) for external companies.

4.8 DESCRIPTION OF BASIC THREATS AND RISKS CONNECTED WITH THE REMAINING MONTHS OF THE FINANCIAL YEAR

In the Group's opinion, one of the most important factors that may affect the Group's operations in the future is the availability of working capital necessary to finance a further increase in turnover, as well as to finance the purchase of mandatory reserves in subsequent periods. The amount of working capital necessary to finance depends on the level of fuel

prices in the markets (especially diesel prices). It will also be important to extend working capital loans and to allocate cash resources in the amount enabling repayment of loans from related entities, or in an optimal scenario to extend the repayment deadline for these loans.

Other factors vital for the development of the Capital Group:

- **Interest rate level** - the Group uses external sources of financing (mainly credits and loans in PLN, and also USD and EUR) the cost of which depends on the level of interest rates. In recent years there has been a significant decline in market interest rates which had a positive impact on debt servicing costs. Favourable, low interest rates (below 2% p.a.) remained in 2018 and in 1H 2019. The Group foresees these levels will be maintained until the end of 2019.
- **Exchange rate level** – the Group sells on the domestic market and exports, while purchases of fuels are mostly carried out on foreign markets and settled in foreign currencies. The main currencies used for export transactions are EUR and USD. In case of an acquisition the settlement currencies are USD, EUR and PLN. The effect of the exchange rates on the Group’s activity is neutralised by the used hedging instruments.
- **Costs of renting tanks at fuel depots** – in several previous years they were at a stable level, the Group does not also foresee significant changes of these costs in the future. However, further growth of fuel sales volumes will result in a growth of total costs. Rates of taxes and charges and other administrative regulations related to the fuel market – their increase may limit the demand on the side of customers and therefore influence the growth of competition and decrease of Group’s revenues or margins.
- **Level of raw material prices** – the business model of the Group mainly relies on the purchase of liquid and gaseous fuels abroad or in Poland, its distribution and subsequent sale. The lack of price stability of liquid and gaseous fuels in Poland and abroad has a significant impact on the margins achieved and consequently on the results obtained by the Group. Additionally, a sharp increase in prices of energy carriers may lead to decrease in consumption, which may translate into deterioration of the financial standing of the Group.
- **Land premium level** (difference between local market price and the price in the port fuel is delivered to the country) – the dominant assortment in the Group’s sales structure. In practice, the amount of land premium results from the level of trade margin achieved by domestic petrochemical concerns in the segment of production and trade. The amount of land premium determines the area of possible to achieve by the Issuer trade margin net of logistics costs (costs of transport, transshipment, quality control), costs of fuel bases capacity hiring, receivables insurance costs (following the adopted by the Group trade security policy) and also cost of fulfilling the NIT obligation.
- **The grey market in fuel trading** - unfair practices of some entities concern the sale of fuels without paying due fees and taxes and in violation of applicable regulations and laws. This results in decrease in competitiveness and reduction in demand for products offered by the Issuer and its subsidiaries, which may adversely affect the financial results achieved. The Group, having many years of experience on the market, is aware of all kinds of restrictions and risks associated with the grey market. The Group takes into account the possible impact of additional costs related to concession fees or hedge of the risk of solidary VAT in the business and the financial forecasts. Transport package adopted in 2017 imposing the obligation of digital registration of transported goods, including liquid fuels, which enables to register and monitor them by means of satellite systems together with fuel package adopted in 2016, significantly limited the grey market in fuel trade, in the opinion of the Group. The Group assumes that the present situation will remain the same until the end of 2019.
- **Costs of achieving National Indicative Target** - The Group's business is affected by the necessity to achieve a minimum annual share of biocomponents and other renewable fuels in the total volume of liquid fuels and liquid biofuels sold or disposed of, or used in any other form for own use, in accordance with the coefficients – the National Indicative Target and the National Reductive Coefficient. Revision of the legislation of 22 July 2016, introduced an obligation to realise the National Indicative Target to at least 50% (calculated according to the calorific value) using the biocomponents contained in liquid fuels to the act on Biocomponents and Liquid Biofuels. This causes the need for use of logistics or storage infrastructure in order to carry out the required blending (physical composition of fuels with biocomponents). The required under the new law activities are performed as services by operators of fuel depots utilised by the Issuer. The costs of NIT achievement that comprise the level of the National Indicative Target, the level of the National Reductive Coefficient, costs of fuel blending, have an impact on the achieved trade margin, which influences directly the Group’s results.
- **Market opportunities** – one of the largest independent fuel importers, a direct competition to the Issuer on 1.08.2019 r. filed for bankruptcy due to the inability to settle liabilities. Simultaneously, information was publicly announced about

termination of credit contracts by financial institutions. This information opens new possibilities for the Issuer in the scope of business opportunities related to both operational acquisition of fuel sales as well as entering by the Issuer's Capital Group into new areas of activity, in which the competitor operated previously. One of such opportunities has already been used – the Group has been joined by a team of experts in the area of asphalt products import and sales, which in recent years have achieved a significant position in this segment in Poland. The Issuer, as a professional and constantly searching for business opportunities entity does not exclude further actions in this scope.

- **Plans of a merger between PKN ORLEN S.A. and LOTOS S.A.** – on 27.02.2018 the Management Board of PKN ORLEN informed about signing a letter of intent between the company and State Treasury concerning taking over the capital control of the Lotos Group. Direct or indirect takeover of 53% of shares is being considered. Both entities achieve their margins both in the segment of production as well as wholesale/retail sale. It is difficult to predict the policy of the merged entity with reference to margins in particular segments. The merger of the entities requires the consent of UOKiK, which may impose additional conditions to fulfil. One of the possible consequences of the merger might be the necessity to dispose of by both subjects several hundred of possessed fuel stations, which would open new perspectives for the Issuer in the scope of developing the chain of AVIA stations. The Group estimates that the necessity of disposal by the merged entity may concern about 250-300 stations, of which Unimot would like to acquire into the AVIA chain about 50 stations.
- **Adopted law on electricity** – adopted on 28th December 2018 law on amending the law on excise tax and several other laws, that is so called law on electricity, amended on 21st February 2019 and 13th June 2019 apart from a decrease in excise duty for electricity, decrease of transition charge (distribution) foresees obliging energy enterprises that conduct activity in the scope of electricity trading to apply in 2019 prices and rates of payments for electricity not higher than applied on 30th June 2018. The amendment of 13th June 2019 significantly limited the scope of the law's application – the mechanism of maintaining/reducing the prices and rates of payments for electricity in settlements with final customers for the 2nd half of 2019 will have a limited scope and will cover exclusively final customers: (i) from a widely understood so called G tariff Group (customers from this group do not have to take any further steps to utilise the mechanism of maintaining/reducing the prices and rates of payments), (ii) being micro-entrepreneurs or small enterprises in terms of the law – The Law of Entrepreneurs, (iii) being hospitals, (iv) being units of public finances sector, (v) being other than specified in items (ii) – (v) public organisational units without legal personality. The customers from the categories described in items (ii) – (v) in order to utilise the mechanism of maintaining/reducing the prices and rates of payments have to submit to the electricity supplier a declaration of their status, i.e. declare that they belong to one of the abovementioned categories.

Energy enterprises are obliged to adjust contracts with final customers and introduce the abovementioned prices and rates within 30 days as of the day of entry into force of the implementing provisions, effective as of 01.01.2019. The implementing provisions will enter into force on 14.08.2019. Energy enterprises will be able to claim compensation for lost revenues from Fundusz Wypłaty Różnic Cenowych (Price Difference Payment Fund), created within Zarządca Rozliczeń S.A., in the form of amounts to cover the difference between the average weighted price of electricity on the wholesale market, calculated according to the formula specified in the regulation, and the volume of revenues resulting from applying the prices and rates as of 30.06.2018. The manner of calculating the compensation results from the published regulation, while until the day of the present statements preparation all the required announcements in the scope of ratios indispensable to apply in practice the formulas included in the regulation had not been published, therefore, it is presently impossible to calculate the potential compensation. Therefore, it is also impossible to verify whether the compensations due for trading enterprises cover the total of the margin lost by the indicated companies.

The law on electricity refers exclusively to settlements with final customers in 2019. Presently, it is difficult to foresee a probability of applying identical or similar regulations in subsequent years. The Group has made preparations and is ready to apply the adopted provisions within the statutory deadline. Despite uncertainty as to all the consequences of the adopted provisions, the companies of the Unimot Capital Group in the electricity segment are still actively acquiring new clients and signing new contracts.

Except the information referred to above there is no other known information about tendencies, uncertain elements, demands, liabilities or events that can have a significant impact on the Group's prospects in the near future.

4.9 TRANSACTIONS WITH RELATED ENTITIES

Transactions concluded by the Issuer and its subsidiaries with related entities were concluded at market conditions.

Interim condensed consolidated statements on changes in equity should be analysed jointly with information which constitute an integral part of the interim condensed consolidated financial statements

6. EXPLANATORY INFORMATION TO THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

6.1 GENERAL PRINCIPLES OF PREPARING THE INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

a) Statement of conformity

The present interim condensed consolidated financial statements ("consolidated financial statements") has been prepared in accordance with the International Accounting Standard 34 "Interim financial reporting" and pursuant to the Regulation of the Minister of Finance of 19 February 2009 on current and periodic information provided by issuers of securities and conditions for recognition as equivalent of information whose disclosure is required under the laws of a non-member state (consolidated text: Journal of Laws of 2014 pos.133, as amended Journal of laws of 2016 pos. 860) („Regulation”) and presents financial situation of the Unimot Capital Group ("Group", "Unimot Group") as of 30th June 2019 and 31st December 2018, the results of its operation and cash flows for the periods of 6 and 3 months ended on 30th June 2019 and 30th June 2018.

b) Principle of operation continuity

Condensed interim consolidated financial statements as of the day and period ended on 30th June 2019 has been prepared assuming that the Unimot Group will continue its economic activity in the foreseeable future. As of the day of preparing the present condensed interim consolidated financial statements the circumstances that may indicate threats to continue the operations by the Unimot Group have not been observed.

Time of operation of the Parent Equity and the remaining entities included in the Unimot Group is indefinite.

The present condensed interim consolidated financial statements, except for the consolidated statements of cash flows, has been prepared in accordance with the accrual principle.

c) Significant accounting principles

The present interim consolidated financial statements were drawn up according to the accounting principles in the scope unchanged with relation to the principles that were applied while preparing the consolidated financial statements for 2018.

In 2019 the Capital Group implemented IFRS 16 "Leasing". The result of changes as of 1st January 2019 has been presented in note No 6.3. The Group made a decision to apply IFRS 16 "Leasing" without converting comparative data, therefore, the previously presented periods are not different with respect to principles applied in 2019.

d) Significant estimates and judgements

Preparation of the financial statements in conformity with International Financial Reporting Standards requires the Management Board of the Company to make judgments, estimates and assumptions that affect the accepted accounting principles and the reported amounts of assets, liabilities, income and expenses. The estimates and underlying assumptions are based on historical experience and other factors that are considered reasonable under given circumstances, and their results provide the basis for professional judgment as to the book value of assets and liabilities not derived directly from other sources. The actual value may differ from the estimated value.

Significant estimates and accounting principles as well as estimated uncertainties applied by the Management Board of the Parent Entity while drawing up the present interim condensed consolidated financial statements are identical as the ones applied while drawing up the annual financial statements for 2018.

6.2 CONVERSION OF CONSOLIDATED COMPARATIVE DATA

In 2018, the Group revised its approach to creating provisions for liabilities related to compulsory reserve maintenance in order to fully comply with the requirements of IAS No. 37. The Group ceased creating the above-mentioned reserves due to the fact that as of the balance sheet date there was no "current" obligation to bear the costs. Due to the above change, the Group converted the comparative data.

Diluted profit (loss) per one share attributable to Parent Entity's owners (in PLN)	(1,48)	-	(0,95)

6.3 IMPACT OF IFRS 16 ON THE GROUP'S FINANCIAL STATEMENTS

IFRS 16 establishes the principles of recognising, valuating, presenting and disclosures related to lease. All the lease transactions result in lessee's right to use an asset and payment liability. Thus, IFRS 16 abolishes the classification of operating and financial lease according to IFRS 17 and introduces one model for the book recognition of lease by the lessee. The lessee is obliged to recognise:

- (a) assets and liabilities for all the lease transactions concluded for the period of over 12 months, apart from a situation where the given asset's value is low; and
- (b) amortisation of the leased asset independently from the interests of the lease liability in the statements on results.

On the day of lease commencement, the Group recognises an asset due to right to use the asset and lease liability. The asset due to right to use is valuated on the commencement date according to cost. On the day of lease commencement, the Group valuates the lease liability in the present value of the remaining lease charges, discounted with the marginal interest rate of the lessee on the day of first application, with the rate adopted by the Unimot Group for the duration of contracts and classes of rights to use. The discount rate applied to lease liabilities valuated as of 1st January 2019 for the Unimot Group amounted to 5%.

The Group made a decision to implement IFRS 16 since 1st January 2019 applying a simplified approach, i.e. retrospectively with a cumulative effect of the present standard's application recognised on the day of first use. The Group has not converted comparative data and the effect of the present standard's application has not resulted in an adjustment of previous years' results.

The Group has applied an adjustment of the value of the right to use assets due to lack of recognising in the preliminary valuation a leasing contract related to a lease contract of one of the petrol stations.

Following the conducted analysis, the Group recognised the following rights to use assets as of 1st January 2019 according to the breakdown into base elements of assets:

	Published data	Changes	Data after changes
<i>in PLN thousand</i>	01.01.2019	01.01.2019	01.01.2019
TANGIBLE FIXED ASSETS	4 468	1 373	5 841

For the above reasons a leasing liability has been recognised in the values below in the breakdown into long- and short-term leasing liabilities:

	Published data	Changes	Data after changes
<i>in PLN thousand</i>	01.01.2019	01.01.2019	01.01.2019
Long-term liabilities due to lease (other lease and rent contracts unrecognised before)	3 493	970	4 463
Short-term liabilities due to lease (other lease and rent contracts unrecognised before)	1 317	61	1 378

With regard to the above grasp there have been no impact on previous years result.

6.4 REPORTING SEGMENTS

Operating segments identification has not changed and is compliant with the principles described in the consolidated financial report as at the day and financial year ending on 31st December 2018

Affiliated entities	370	236	74	-
Total	432	315	468	522

In the period of 6 months finished on 30th June 2019 and 30th June 2018 transactions concluded with related entities at conditions different than market ones did not occur in the Company. These transactions concerned primarily purchases of goods and services for the needs of current operating activity.

7.15 CONTINGENT LIABILITIES

The Group held the following contingent liabilities as of 30th June 2019 and 31st December 2018:

The amount of guarantees of the Parent Equity Unimot S.A. towards third parties issued in the course of current activity as of 30th June 2019 and as of 31st December 2019 amounted respectively to PLN 50.40 million and EUR 1.7 million and PLN 61.17 million and EUR 1.45 million. In EUR. They concerned primarily: civil-law guarantees associated with securing due execution of agreements and public-law guarantees resulting from commonly valid regulations securing correctness of conducting licensed activity in the liquid fuels sector and resulting from this activity duties such as tax, customs, etc.

The value of standby letters of credit issued upon request of the Parent Equity Unimot SA as of 30th June 2019 and as of 31st December 2018 amounted respectively to USD 79.8 thousand and USD 0.

The Parent Entity Unimot S.A. granted civil surety for liabilities of affiliated non-consolidated entity in the amounts as of 30th June 2019 and as of 31st December 2018 respectively PLN 2.5 million and PLN 1.6 million.

The amount of guarantees with reference to liabilities of subsidiaries towards third parties, issued in the course of current activity as of 30th June 2019 and as of 31st December 2018 amounted respectively to PLN 22.04 million and PLN 15.24 million.

Related entities held sureties towards third parties as of 30th June 2019 and as of 31st December 2018 that amounted respectively to PLN 14.15 million and PLN 14.15 million.

7.16 EVENTS AFTER THE REPORTING PERIOD

The following events occurred after the end of the reporting period:

- **Disinvestment in the natural gas area**

On 13th August 2019 an agreement was signed on a partial disinvestment in the natural gas area, which covers the joint venture with Blue Line Engineering S.A. under the investment contract of 12th February 2014 (current report No 6/2014) with later annexes.

The result of the disinvestment process is supposed to be the acquisition by the Issuer 100% of shares in UNIMOT System Sp. z o.o. and acquisition by Blue Line Engineering S.A. 100% of shares in the remaining subsidiaries, i.e. Blue Cold Sp. z o.o. and Blue LNG Sp. z o.o., while simultaneously organising the structure of receivables and liabilities in these companies and bank collateral within the Issuer's Capital Group and BLE Capital Group.

The above-mentioned event has been described more fully in item 3.2 of the present statements.

Interim condensed standalone statements on changes in equity should be analysed jointly with explanatory information which constitute an integral part of the interim condensed standalone financial statements

9. CONDENSED SUPPLEMENTARY INFORMATION TO THE INTERIM CONDENSED STANDALONE FINANCIAL STATEMENTS

In the condensed additional information to the interim condensed standalone financial statements Unimot S.A. has only presented the notes that include consolidated data. Other notes based exclusively on Parent Entity's data (NO 7.11, 7.13), have been presented in supplementary information to the interim condensed consolidated financial statements.

9.1 CONVERSION OF STANDALONE COMPARATIVE DATA

In 2018, the Company revised its approach to creating provisions for liabilities related to compulsory reserve maintenance in order to fully comply with the requirements of IAS No. 37. The company ceased creating the above-mentioned reserves due to the fact that as of the balance sheet day there was no "current" obligation to bear the costs. Due to the above change, the Company converted the comparative data.
